

BUILDING HIGH PERFORMANCE AGILE TEAMS

In any modern organisation, software has an increasingly important role to play. From content management systems to warehouse databases and e-commerce stores, software applications are fundamental to any successful business, yet are often a source of frustration for the business owner.

Software teams can take that frustration away by creating software that provides a positive experience for both the organisation running it, and the audience using it. It's therefore important to make sure your team is well equipped to handle the challenges they'll face along the way.

Written by the team at Made Tech, this book is your guide to building an agile, productive, and happy software delivery team.
